## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 35-47 are rejected under 35 U.S.C. 102(e) as being anticipated by Hovda et al (US 6,264,650).

Hovda discloses a device (figs. 7B, 8A, and 8C) having a shaft 100, a control structure 28 operably connected to the shaft by means of 34, at least one injury effector 104, and at least one therapeutic-substance delivery effector 112 or the plurality of fluid lumens around the perimeter of shaft 100 at the distal end of the shaft.

### *Response to Arguments*

3. Applicant's arguments filed December 5, 2005 have been fully considered but they are not persuasive.

4. In response to applicant's arguments that Hovda does not teach, discloses or suggest a therapeutic substance, this is not found persuasive. It is common knowledge that isotonic saline has been used to human conditions such as lumbar disc problems (see article "Use of epidural steroids in the treatment of sciatica-Tips from Other Journals", **American Family Physician**, Nov.15, 1997, by Jeffrey Kirchner), for

electrolyte disorders, and others. Therefore, Hovda's isotonic solution can also treat the lumbar disc while also work as an electric conductor.

### ***Conclusion***

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See PTO-892 Form.

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
